Euromax Resources Community Investment Framework

Euromax Resources is committed to supporting the local communities in the areas it operates through meaningful local community investment programmes. We will maintain ethical business practices at all time and offer not only financial support but also in respect of the company’s resources, expertise, advice and business relationships. We will only support projects that are aligned with our own company values and our preference is to proactively identify suitable investments using the criteria below rather than invite proposals to be submitted to the company.

We will assess our community investments based on the following criteria:

1. We will only support sustainable programmes that have a longer-term social and economic contribution to the wider community. We are looking to create lasting benefits that continue longer than the term of the investment;
2. We seek to work with local stakeholder groups, rather than individuals, such that our programmes benefit a wide stakeholder base;
3. We are committed to supporting educational and skills programmes and actively support building on social capital;
4. We will support initiatives that promote an active, healthy lifestyle and encourage awareness of health issues in the regions we operate;
5. We will support activities that focus on improving awareness for environmental protection, environmental conservation and that cover broader topics such as water and forestry resources and waste management;
6. We will support the cultural heritage of local populations through support of cultural events in the municipalities where we operate;
7. We will ensure that any selected proposals and development plans will also be aligned with local agency plans;
8. We encourage and support selected local businesses and organisations that could provide longer term economic stability to the area;
9. We will support matched funding or contributions in kind from benefitting parties;
10. We will partner with NGO’s to deliver programmes where appropriate;
11. We will give due support to all our stakeholders, and in particular give due consideration for vulnerable and minority groups;
12. We will not support any programmes that could potentially negatively impact the local land, water, air or wildlife;
13. We will not support activities that could be dangerous or in any way endanger human health or well-being;
14. We see value in diversity and will support programmes that promote equal opportunities for all members of the local communities;
15. We will not support activities that are gender-specific, unless balanced by another investment that benefits the opposite sex;

In order to complete our community investments, each project selected for support will be required to provide a project proposal to include a detailed description of the project and detail of capital and operating budgets, where applicable. In addition, any stakeholders, NGOs, local civil associations, which we will support should be registered with the relevant authorities and be willing to provide documentation on legal ownership. All identified investments will be presented to the company for final approval.

Euromax will monitor, record and supervise the investments that we make and will require that regular reporting is delivered to the company on the progress of investment. At the company’s discretion, selected projects may also be profiled on the company’s website http://www.euromaxresources.com
